Bowen-Jones, Howard. Agriculture in Malta. A Survey of Land Use 1955. Durham, England: Department of Geography, Durham Colleges in the University of Durham, 1955.

Pp. iv, 6, 2, 2, 7, 21, 5, 6, 12, 6, 38, 5, 4, 2; numerous figures, maps and diagrams.

Indiana University Library: S269. M3B78.

[This mimeographed publication is the result of a five-week investigation during March-April 1955 undertaking a survey of agricultural problems in the island of Malta. The publication is divided into twelve parts, each being paginated separately. They are: foreword, introduction statistics, climate and irrigation, soils, crops, crop varieties, livestock, cultivation equipment and techniques, regional studies, husbandry, commercial conditions, and summary and conclusions. Since most of this material has been duplicated by other sources in the Malta file, this source has not been processed.]

Buxton, L. H. Dudley. Malta: An Anthropogeographical Study. The Geographical Review, Vol. 14, pp. 75-87. New York: The American Geographical Society of New York, 1924.

1 table; 1 map.

HRAF copy.

[This source briefly discusses the anthropogeography of Malta, with sections on the physical setting, rock structure, climate, vegetation, history of man on the island, and estimates and censuses of Maltese population. Since the same material is covered in much greater detail in 1: Bowen-Jones et al., this file, this source has not been processed.]

Busuttil, Vincenzo. A Tourist's Guide to the Maltese Islands Including an Historical Summary. Malta: Printed at the "Malta Herald" Printing Office, 1924.

Pp. 148; 1 map; railway time table.

Library of Congress: DG989.B8.

[This guide contains brief descriptions of Malta, its history, geography, politics, points of interest, and other items of interest to the casual tourist. Since most of the information is also found in other sources in this file, this guide has not been processed.]

Laferla, Albert V. The Story of Man in Malta. With an Introduction by His Excellency Sir Harry Luke. 3rd edition. Malta: A. C. Aquilina & Co., 1958.

Pp. viii, 212.

University of Washington: 945.8 L131S3.

[This volume was written primarily as a history of Malta for those attending schools in Malta and Gozo. In numerous short chapters, the author, a former Director of Education in Malta, details the history of the islands from prehistoric times until the year 1800. Since this file is concerned with Malta in the twentieth century, the volume has not been processed.]

Lang, D. M. Soils of Malta and Gozo. Great Britain, Colonial Office, Colonial Research Studies, No. 29. London: Her Majesty's Stationery Office, 1960.

Pp. iii, 112; 8 photographs; many tables and maps.

Yale: Oyd20 + A14 29.

[This mimeographed report is the outcome of eight months of fieldwork in the Maltese Islands and subsequent analysis of samples at the Macaulay Institute for Soil Research. The seven chapters are: Location and extent, geology, climate, geomorphology; Field methods, description of soil profiles; Carbonate raw soils; The Xerorendzinas; Terrae Calxis; Vegetation and agriculture; and, Discussion on methods and results of chemical analysis. Appendix I gives the profile descriptions and Appendix II contains five tables of analytical data. The data contained in this work form a necessary background to any analysis of Maltese agriculture. However, it contains little cultural data and, therefore, has not been processed for the EZ6 Malta file.]

Malta. Central Office of Statistics. Census 1957, The Maltese Islands, Report on Population and Housing. Valletta (?): Central Office of Statistics, 1959.

Pp. xcix, 276; numerous tables and diagrams; 2 maps.

Library of Congress: HA1117.M3A56 1957a.

[This source is one of a series dealing with data from the Maltese census of 1957. The analysis supported by detailed tabulations, covers such subjects as changes in population of localities, changes in the age and sex structure, marital status and sex-ratio, terminal education age and illiteracy, households and their size, households in shared dwellings, density of occupation, tenure and rent, sanitary arrangements and domestic amenities, special characteristics of common tenement houses, schools, hospitals, religious communities, and other government and private institutions. This is a valuable compilation of data and in other circumstances would have been processed for the Malta file. However, its unwieldy size and the poor quality of the printing have made processing unfeasible at this time.]

Malta. Central Office of Statistics. Census 1957, The Maltese Islands, Report on Economic Activities. Valletta (?): Central Office of Statistics, 1959.

Pp. cviii, 318; numerous tables and diagrams.

Library of Congress: HA1117.M3A56 1957b.

[This source is the fourth of a series dealing with data from the Maltese census of 1957. It describes the gainfully occupied population and their economic activities, and contains a comprehensive and detailed set of tabulations. Data on economically inactive persons, on full or part time occupations, sickness and unemployment and on full time education are also given. This is a valuable compilation of data and in other circumstances would have been processed for the Malta file. However, its unwieldy size and the poor quality of the printing have made processing unfeasible at this time.]

Mitchell, Peter K. Studies in the Agrarian Geography of Malta. A Report to Her Majesty's Colonial Economic Research Committee. 2 Parts. Durham, England: Department of Geography, Durham Colleges in the University of Durham, 1959.

Pp. x, 98; 22 tables; 23 figures; 3 appendices /Part I/; pp. xiii, 99-225; tables 23-40; figures 24-38; 2 appendices /Part II/.

Indiana University Library: S269.M3M68 v.1, v.2.

[These mimeographed volumes contain the results of an investigation by the author into the geography of Malta in 1957 and 1958. The research and the report are divided into two major sections: climatic studies, with special emphasis on the moisture factor in the local climate; and agronomic studies, which were intended to give a clear picture of present practice and recent developments in Maltese agriculture, taking the farm as the basic physical and economic unit. Since most of the information in these volumes is also given in more compact form in 1: Bowen-Jones et al., this file, this source has not been processed. Part II of this source does contain a number of case studies of individual farms which are of some interest.]

Weber, Bernerd C. Some Aspects of Maltese Folklore. Southern Folklore Quarterly, Vol. 24, Pp. 239-241. Gainesville, Florida: The University of Florida in Cooperation with the South Atlantic Modern Language Association, 1960.

Yale: Nkg10 So86 24.

[This brief article comments on a few practices which the author relates to survivals from the various historical invasions of the archipelago. Since the material is so general, it has not been processed.]

Zammit, Themistocles. Malta, The Islands and Their History. Valletta: Printed at "The Malta Herald" Office, 1926.

Pp. viii, 456; 24 appendices; bibliography; endpaper map.

Yale: Bm99.8f.

[The aim of the author in writing this concise account of Malta and its history was to bring together, in the simplest possible form, information which is to be found scattered through many volumes. Zammit was a noted Maltese historian and archeologist. Since much of this information, and of a more recent vintage, is found in other sources in the file, this book has not been processed.]
